ENTERTAINMENT

Today's homeowner lives in a digital world. Together we can build homes that puts you in the driver's seat. Our solutions will let you watch, listen, and play when, where and how you want. Let us breathe life into your home.

- MUSIC
- THEATER
- TV/VIDEO

COMMUNICATIONS

Information is power. You deserve a home where questions can be answered and voices can be heard. We can help build the infrastructure where voice and data co-exist seamlessly and you are always well connected to the digital world.

- INTERNET
- INTERCOM
- TELEPHONE
- HOME OFFICE

COMFORT

Energy costs are rising. The biggest culprit is electricity and climate. Our intelligent systems will give you peace of mind and the sense of security you demand. With your ideas and our brains in harmony, we can work together to create a home that keeps giving.

- LIGHTING
- CLIMATE CONTROL
- SECURITY/CAMERA
- HOME AUTOMATION
- CENTRAL VACUUM

STRUCTURED WIRING

This is the most important part of a Digital Home. This package is customized around the size and/ or needs of the home. RG6 is used to distribute television and Cat5e/6 is used to distribute voice and data. As a standard we will terminate up to 8 TV outlets and 8 phone outlets as well as 4 data outlets. All wiring is home-run to a structured wiring panel to provide easy access and troubleshooting. Additional drops may be necessary to facilitate advanced features such as premium audio, video, and home automation options.

Structured Wiring Add-On Options

- Additional TV Locations
- Satellite Pre-wire
- Additional Voice Locations
- Camera Distribution
- Additional Data Locations
- Advance IP Features

HOME CONTROL

These solutions provide an opportunity to exponentially increase the value of the home while at the same time provide convenience for you and energy conservation for the environment. With today's technology it is now possible to control every system of the home through automation. With a touch screen you can command lights, shades, audio, video, security, HVAC, irrigation, and many others. With automation it is possible to simplify a series of tasks with the touch of a single button. To put it simply, we make it easy to use!

Home Control Options

- | | |
|----------------------|----------------------|
| Thermostats ■ | ■ Appliance Control |
| Surveillance ■ | ■ Energy Management |
| Media Servers ■ | ■ Solar Panels |
| Audio Distribution ■ | ■ Remote Access |
| Lighting ■ | ■ Water Conservation |
| Draperies ■ | ■ Video Distribution |
| Security ■ | ■ Intercom |

With a myriad of technology options available it is important to speak to a professional who can design a system that meets the needs of your home. Home automation is no longer only in the realm of millionaires. We can create solutions that provides you with the real-world benefit of convenience and ease-of-use.

THEATER

PREMIUM THEATER

Give the yourself that special place to watch movies and listen to music the way it was meant to be; in surround sound. This solution is wired for five speakers and a powered subwoofer. We will work together to determine the proper locations for equipment and speaker placement. This also includes pre-wiring for an IR repeater to hide the equipment out of site and running cables to the TV will never be a problem with included future-proof conduit.

ULTIMATE THEATER

Include everything in the premium solution but take it to the next level with amazing performance. Standard 7.1 surround sound if the room permits will immerse the homeowner. Upgraded cables, speakers, and a high performance receiver are included in this solution. Integrate with your distributed audio/video system to share entertainment everywhere. Conceal the subwoofer behind the wall or in the ceiling for a complete stealth system.

CUSTOM THEATER

This is the solution that makes your dreams come true. Imagination is your only limitation. Typically a custom theater has its own specially designed space in the home. Yourself, the builder, architect, designer, and our team come together to create a fantastic experience. From sound deadening, acoustical treatments, motorized shades, lighting control, custom woodwork, theater seating, front projection, media servers, and beyond. On this playground, nothing is off limits. All simple to use from the included touch screen

Premium Add-On Options

- Upgrade Your Speakers
- Audio/Video Equipment
- Flat Panel TV w/ Wall Mount
- Custom Cabinetry
- Upgrade to 6 or 7 Speakers
- Simply Control Remote

Ultimate Theater Add-On Options

- Touch screen remote
- Home Automation Ready
- Custom Cabinetry
- Flat Panel TV w/ Wall Mount
- Complete Equipment Solution

Custom Theater Add-On Options

- Professional Calibration
- Larger Display Touch Screen
- Home Automation Control
- Lighting Scenes
- Motorized Blackout Window Shades
- Digital Music & Movie Storage
- Custom Woodwork/Theatrical Elements

MUSIC

BASIC MUSIC

High-quality distributed audio in four rooms of the home. Additionally, we'll pre-wire two additional rooms for audio for future expansion. Control source volume with a digital volume control in each zone. A convenient audio wall plate will allow quick integration of any standard audio source to be broadcast throughout the house. An infrared remote easily and intuitively controls the system.

PREMIUM MUSIC

The same high quality distributed audio, now in six rooms of the home. Six sources built in allow the homeowner to play what they want, where they want. An Advanced Digital Keypad can control sources directly without the need for a remote. An external amplifier provides more power to speakers and can be daisy-chained to add additional zones. Serial control gives the ability for the system to be integrated into a more robust home automation solution.

ULTIMATE MUSIC

Ultimate quality distributed music in at least six rooms of the home. As well, we will pre-wire 2 other rooms for system expansion. This solution provides digital keypads for individual room control and one central touch screen. Daisy-chain multiple units or add more touch screens. In-wall iPod docks allows you to control an iPod from any zone in the house. Designate a space for equipment rack and you're on your way to a true Smart Home.

Basic Music Add-On Options

- Additional Sources
- Additional Zones
- In-room Local Inputs

Premium Music Add-On Options

- Additional Zones
- Upgraded Speakers
- In-room Local Inputs
- iPod Dock
- Touch screen Keypad

Ultimate Music Add-On Options

- Trim-out Additional Zones
- Integrate with Phone/Intercom
- Home Automation Ready
- Central Equipment Rack
- Additional Touch screens
- Video Distribution

* All distributed audio wiring is standard no matter which level you choose. We want to guarantee compatibility and provide a path for future expansion.

TV/VIDEO

PREMIUM TV

The premium TV solution gives you greater flexibility for future technologies. In addition to the standard RG6 at each television location, the premium solution adds additional Cat5e/6 to the wall plate for video sharing and control. With the added Cat5e/6 it is now possible to distribute HDTV quality audio/video to every room in the home from one central hub.

Premium TV Add-On Options

- Media Servers
- Home Automation Ready
- Centralized Equipment Rack

INTERNET

WIRED INTERNET

Securely access the Internet from up to four locations around your home. The router will be installed in the structured wiring panel making access plug and play. This will give you an easy and reliable way to share printers, files and digital content.

WIRELESS INTERNET

Place a wireless access point in a central part of the home for reliable wireless Internet wherever you are, even outside. The access point is professionally installed in the wall or ceiling so no wires are seen.

PREMIUM HYBRID INTERNET

Combine wireless and wired connections for the best flexibility. In addition to the chosen hardwired locations, you will have convenient Wi-Fi throughout the home. With Wi-Fi you can have three hardwired locations. If more is needed than an optional Ethernet switch is required.

Wired Internet Add-On Options

- Additional Locations
- Internet/Data Surge
- Wi-Fi Access Point

Wireless Internet Add-On Options

- Multiple AP
- Internet/Data Surge

Premium Hybrid Internet

- Additional Locations
- Ethernet Switch
- Internet/Data Surge

* With our wiring solutions any location with Cat5e/6 can be used as either phone or data access

INTERCOM

BASIC INTERCOM

Communicate throughout the home with an intercom station in every room. This solution will provide units in three rooms and a door station. In addition, we'll pre-wire three additional locations for future needs. These units have baby monitor and Do-Not-Disturb functionality.

PREMIUM INTERCOM

Add an additional three intercom units in desired locations and we'll pre-wire for a second door station. We'll provide an upgrade path to integrate the intercom system into the distributed audio. This solution is expandable to include every room in the home with intercom convenience.

ULTIMATE INTERCOM

This solution integrates seamlessly with the premium distributed audio and home control solutions. We'll pre-wire central locations to be outfitted with color touch screens and pre-wire for cameras to be placed at entrances so you can see who is at the door. Door strikes can be installed to unlock the door remotely.

Basic Intercom Add-On Options

- Extra Room Unit
- Extra Door Unit
- Desktop Unit
- Patio Unit

Premium Intercom Add-On Options

- Extra Room Unit
- Extra Door Unit
- Door Strike
- Up to 36 Rooms

Ultimate Intercom Add-On Options

- Color Touch screen
- Camera
- Door Strikes

TELEPHONE

BASIC TELEPHONE

With our telephone solutions you can distribute up to four phone lines throughout the home. We can integrate with standard landlines and the newer VoIP lines. The system integrates with the security system so in the event of an emergency any line can be seized to allow the system to alert the monitoring station.

HOME OFFICE

Our home office solution is perfect for those of you that work from home. From one convenient connection plate you will have access to phone and fax lines as well as a wired Internet connection. We will run a cable TV outlet as well so the you can watch or record TV on your PC*. Whether your ISP provides Internet via cable or DSL, this solution can handle your needs. *Depends on the PC system used.

LIGHTING

HOME LIGHTING

With energy costs raising it is important to make your home as efficient as possible. With our lighting solutions you will have the convenience and safety of an automated system that will ultimately save you money. Using the latest technology, we can create scenes that turn on multiple lights with the touch of a button or integrate with the security system to turn on the lights when the alarm is activated. Or, we can create lighting pathways to illuminate your way to the bathroom. Or, add occupancy sensors so the lights turn on and off when someone enters or leaves the room. Additionally, you can control every light in the home from one convenient touch screen.

Home Lighting Add-On Options

- Outdoor Lighting Scene
- Party Lighting Scene
- Additional Lights
- Additional Touch Screens

SECURITY

BASIC SECURITY

Our security solution will secure every perimeter door in the home. Indoor and outdoor sirens will scare off any intruder attempting to gain access. Two keypads will give you ample time to disarm the system when you return. Two motion sensors and one glass break sensor will scan the house waiting for anything suspicious.

Basic Camera Add-On Options

- Additional Motion Sensor
- Additional Glass Break Sensor
- Window Sensors
- Remote Access

THEATER LIGHTING

This solution is perfect way to compliment the entertainment area of a home. With our flexible solution you can press one button that automatically dims the lights, closes the shades and starts the movie. Lighting creates moods and atmosphere; including our lighting solutions will enhance artwork or architectural features and increase the value of the home.

Theater Lighting Add-On Options

- Occupancy Sensors
- Intermission Scene
- Custom Design For Your Room

PREMIUM SECURITY

With this security solution we will place sensors on every perimeter door and perimeter window in the home. Multiple motion sensors and glass break sensors will protect the inside. We will pre-wire for a security camera for added peace of mind. A digital backup communicator will allow the system to alert authorities even if the phone line is cut.

Premium Camera Add-On Options

- Remote Access
- Overhead Garage Door Sensor
- Home Automation Ready
- Watch cameras remotely using

CENTRAL VACUUM

With our central vacuum solution you will never have to worry about noisy machines or carrying heavy equipment. Depending on size of the home, various outlets will be strategically placed for complete coverage of the area. In the kitchen, high traffic areas, and places with hard surfaces we can install sweep pans that pick up the dirt quickly and efficiently. All the debris is whisked away by the powerful remote power unit. The built-in monitoring system reminds you when to check the dirt receptacle and the system even includes a self-cleaning permanent filter. With our system you can tackle whole house cleaning with comfort and ease!

Central Vacuum Add-on Options

- Car Care Kit For The Garage
- Extra Cleaning Tools
- Extra Power-Head And Hose

ULTIMATE SECURITY

The purpose of the ultimate security solution is to offer all the options of the premium package as well as integrate seamlessly with the rest of the home control solution. Cameras and sensors will propagate the home so nothing goes unnoticed. The system will provide simple control from a touch screen interface. The same interface used to control the premium systems solutions throughout the home.

Ultimate Camera Add-On Options

- Watch cameras remotely using a high-speed Internet connection
